

ECOACCESS AND POLYACCESS CLEANING RECOMMENDATIONS

ECOACCESS AND POLYACCESS DOORS have an occasional need for spot cleaning to remove light dirt, grease and debris. This door is easy to clean using the following guidelines:

(Routine Cleaning) - Use detergent or soap and water. Wipe with a sponge or cotton cloth, rinse and wipe dry. Polish with mineral oil or a plastic conditioner. Clean using a light steady pressure.

For hard water spots and scale, wipe or rub with vinegar or isopropyl alcohol. Rinse with water and dry.

- Do not use strong oxidizers or solvents such as paint strippers, acetone, or petroleum-based degreasers.
- Do not use abrasive materials such as abrasive sponges, steel wool, or sandpaper.
