ELECTRICAL CHICKEN ROTISSERIE

A GENERAL INFORMATION

Before installing the appliance, read operation and maintenance instructions carefully. Wrong installation and part changing may damage the product or may cause injury on people. These are not in our company's responsibility to damage the appliance intentionally, negligence, detriments because of disobeying instructions and regulations, wrong connections. Unauthorized intervention to appliance invalidates the warranty.

1. This instruction manual should be kept in a safe place for future reference.
2. Installation should be made in accordance with ordinances and security rules of that country by a qualified service personnel.
3. This appliance has to be used by trained person.
4. Please turn off the appliance immediately in the event of malfunction or failure. The appliance should be repaired only by authorized service personnel. Please demand original spare part.

WARNING:

- This device must be installed in accordance with applicable legislation and should only be used in a well-ventilated area. Please refer to the instructions before installing and using this device.
- Improper installation, adjustment, modification, service or maintenance can result in property damage, injury or death. Read the installation, use and maintenance instructions before installing or servicing this equipment.

SAFETY SYMBOLS

These symbols are intended to alert the user to the presence of important operating and maintenance instructions in the manual accompanying the appliance.

If the relevant instruction cannot be obtained;

- 1) If the device pressure values are above 1/2 psi (3.5 kPa), disconnect the gas supply pipe from the device.
- 2) If the device pressure values are equal to 1/2 psi (3.5 kPa), close the gas supply pipe manually and isolate the gas supply pipe system.

WARNING: The device must be used by trained personnel

ELECTRICAL CHICKEN ROTISSERIE

A1 PRODUCT DESCRIPTION

*The Professional Electrical chicken rotisserie ,that provides high efficiency has been designed to be used in industrial kitchen.

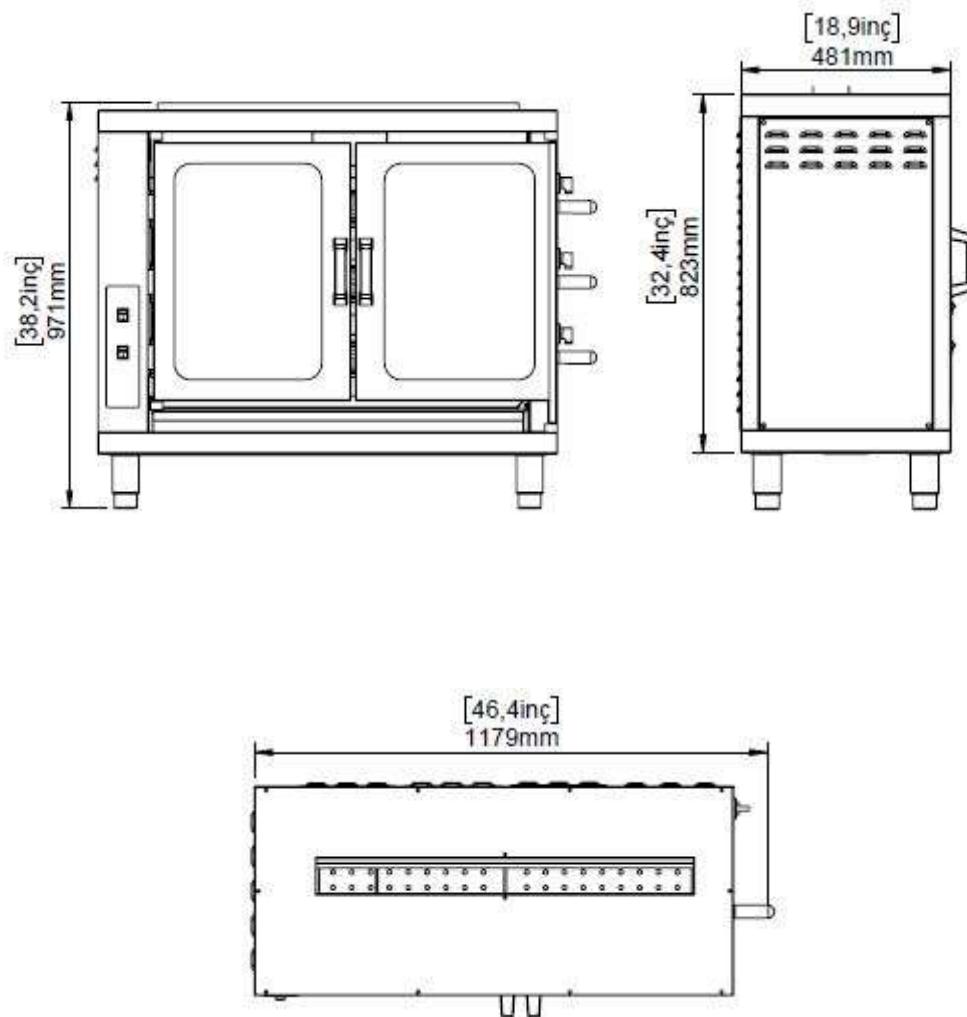

Model	Length cm / inch	Depth cm / inch	Height cm / inch	Approximate Weight	
				Unpacked Kg/Lb	Packed Kg/Lb
CR-3E	1179 mm 46,4"	481 mm 18,9"	971 mm 38.2"	108 kg 238.09 lb	118 kg 260.14 lb

A3 TRANSPORTATION

*This appliance can not be moved by hand from area to area. It must be moved on pallet with forklift truck.

A4 UNPACKING

*Please unpack the package according to the security codes and ordinances of current country and get rid from the pack. Parts which contacts with food are produced by stainless steel. All plastic parts are marked by material's symbol.

*Please check that all the parts of appliance had come completely and if they are damaged or not during the shipping.

B INSTALLATION

*Please place the product to straight and sturdy ground, please take necessary steps against possibility of overturn.

*Technician who will serve for installation and service for the appliance must be professional on this subject and must have installation and service licenses by the company.

*Connection to Electric Power Supply must be done by authorized person.

*Please be sure that the voltage connected to appliance must be equal with the voltage which is on appliance's label.

 This appliance must be connected to an earthed outlet in accordance with safety rules and standard.

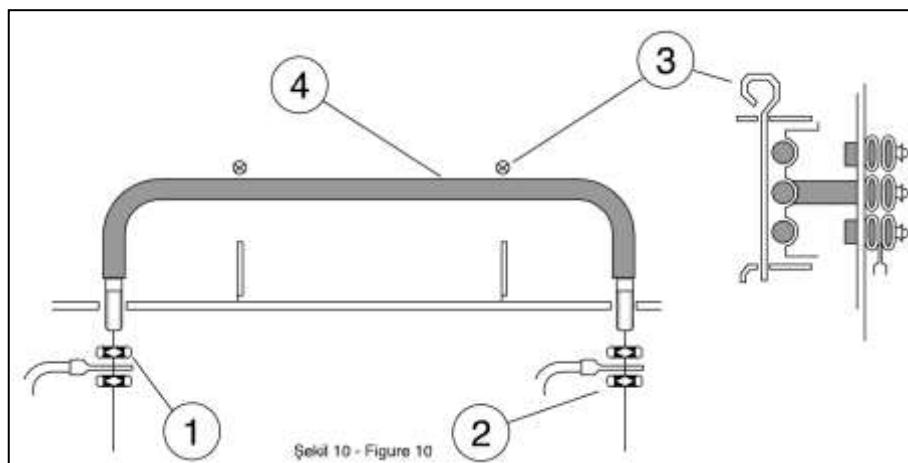

*Appliance's earthing must be connected to earthing line on panel which is nearest to electric installation.

*Connection to the main fuse and leak current fuse must be done in accordance with the current regulations.

*The rotisserie is equipped with at least one infrared burner and may have up to eight.

Each burner has three linear resistors, arranged in a parallel configuration over the width of the roasting chamber. The electric equipment of the rotisserie is supplied by three-phase 380 VAC, 50 Hz power set by the companies which produce in accordance with legal regulations and the power conditions. The rotisserie contains a neutral wire and an earthing connection. Power is supplied through a terminal box located at the rear of the appliance. (figure 10)

ELECTRICAL CHICKEN ROTISSERIE

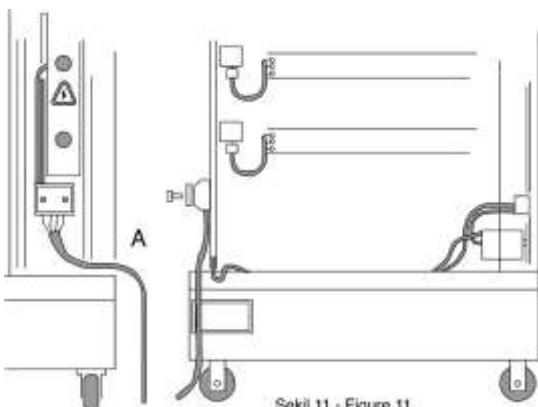

MAINS CONNECTION

Remove the control knobs, loosen the screws holding the knob cover and remove the cover. Connect the three phase wires, neutral and earthing connection to the terminal strip, then attach the cable to clamp (A).

Make sure that the cable rating is high enough for the rotisserie power!

The drive motor is factory-installed and does not require any further installation.

(Figure 11)

ELECTRICAL CHICKEN ROTISSERIE

C SAFETY INSTRUCTIONS

*Do not use the appliance in insufficient lighted place.

*Do not touch the moving attachments while the appliance operates.

*Do not install the appliance in the presence of flammable or explosive materials.

*Do not operate the appliance when the machine is empty.

*Do not load so less or more than appliance's capacity.

*Do not attempt to use the appliance without suitable protective equipments.

*Because of any reason if there is a fire or flame flare where the appliance is used, turn off all gas valves and electric contactor switch quickly and use fire extinguisher. Never use water to extinguish the fire.

*All the damages because of not having earthing connection will not be on warranty.

a) Adequate means must be provided to limit the movement of the appliance without depending on or transmitting stress to the electrical conduit;

b) Restraint device is located on the back side of applinace.

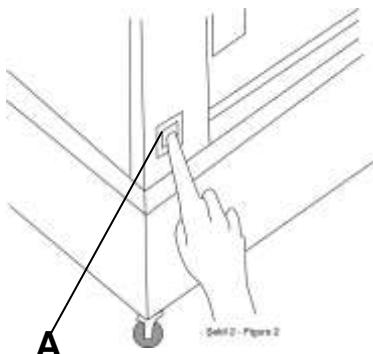

c) The appliance shall be installed using flexible conduit.

ELECTRICAL CHICKEN ROTISSERIE

D OPERATION

* Control Panel:

A : ON/OFF button

*Operating:

- Plug in the appliance.
- Switch to (on/off) position.
- The rotisserie is equipped with a drive chain transmission used to rotate all spits at the same time in order to heat all meat evenly. The optimal preset rotational speed for perfect roasting is 4.5 rpm and the gear box ensures maximum continuous torque of 81.9 Ncm (9lbs.inch).
- The transmission is located in the left column (facing the machine), with the motor at the bottom above the base. The column also contains a lighted start-stop switch.
To use all burners, always begin by lighting the top burner, working downward until reaching the lowest burner as shown. Never leave a burner on for roasting when the only immediately below it is off!
- Your rotisserie comes equipped with an accessory kit that includes spits, skewers, a hook to remove the spits and a tray.
- Used to hold the chickens or pieces of meat. The spits have a square cross-section which is inserted into the drive hubs and used to turn the meat. The spits are equipped with a heat-resistant handle to prevent burns. The number of spits depends on the model.
- Placed beneath the spits at the bottom of the roasting chamber to collect juices released when roasting. Always clean the tray carefully after each roast.
- Turn off all knobs when the rotisserie is not used.

ELECTRICAL CHICKEN ROTISSERIE

E CLEANING & MAINTENANCE

To clean

- To clean the rotisserie, you may use any nontoxic, nonaggressive, product available on the market.
- Take care not to pour the cleaning product directly on the burner's microperforated surface.
- Never use abrasive products that could scratch painted or stainless steel surfaces. The quality of your roasts depend on the cleanliness of your rotisserie.
- To cleaning the plate between the burners

Follow these steps

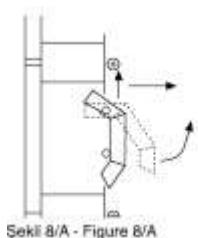

- a) Push the lower edge of the plate up to its horizontal position.
- b) Push the plate as far as possible.
- c) Pull the plate up and then out to remove completely.

To insert the plate, follow these steps

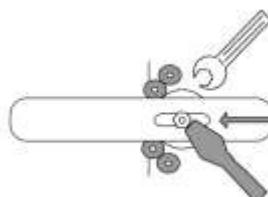

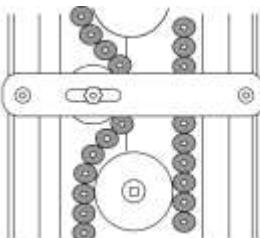

- a) Insert the horizontal plate such that the side slots match the pivots on both sides.
- b) Let the plate rotate freely.

Tensing the drive chain

To tense the drive chain, loosen the idler pinion screws (A) with a screwdriver and push the pinion slightly to the right until the chain is taut. Tighten the screw (A). Lubricate with molikote-type grease or similar (Figure 9)

Sekil 8/A - Figure 8/A

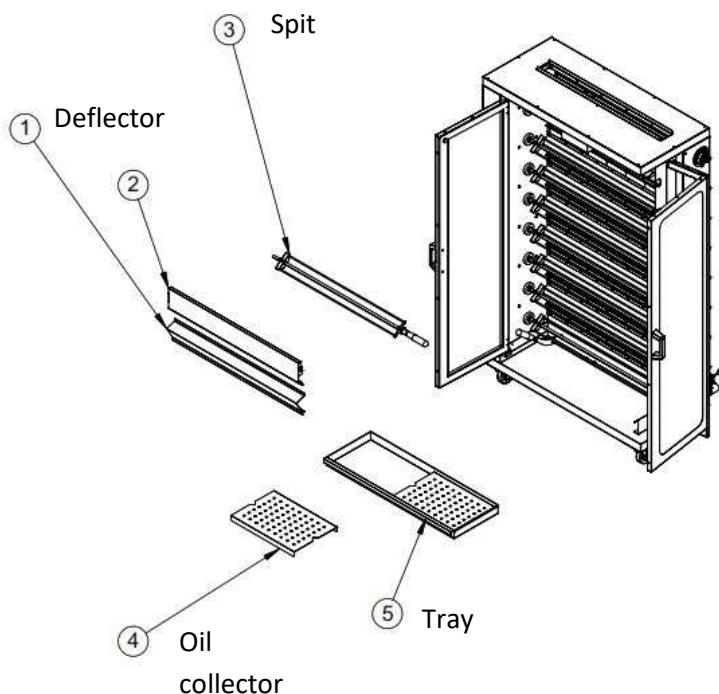

Sekil 9 - Figure 9

ELECTRICAL CHICKEN ROTISSERIE

DAILY CLEANING

Everday after using the rotisserie pls. remove these parts (1-2-3-4-5)
And to clean with hot water and mild detergent and put back to the
machine.

Do not use abbrasive chemical like bleach detergent which effects rusting
on the parts.

ELECTRICAL CHICKEN ROTISSERIE

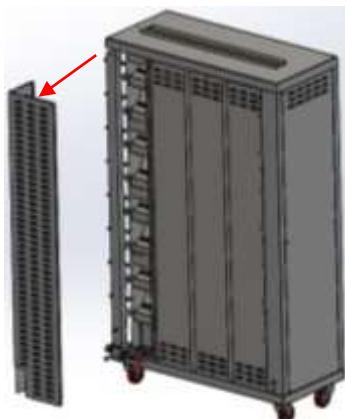

CLEANING INSTRUCTIONS

As shown in the pictures below, the screws of the side and rear panels are unscrewed and removed. Wipe with a damp cloth.

Please use screwdriver to remove the back and side panels for cleaning.

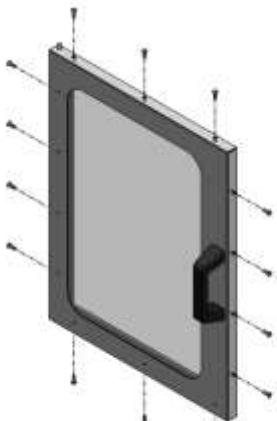

Please use wet clothes with mild detergent do not use abrasive detergent.

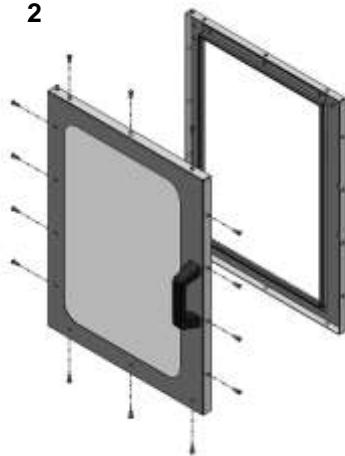

ELECTRICAL CHICKEN ROTISSERIE

CHANGE THE DOOR GASKET

1.

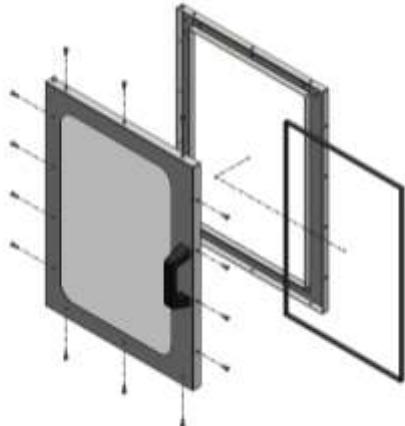

2

The screws are removed from the outer door with the help of a screwdriver.

The inner cover is separated from the outer cover. The gasket becomes visible.

3.

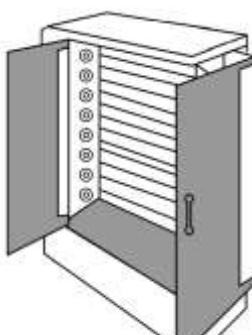

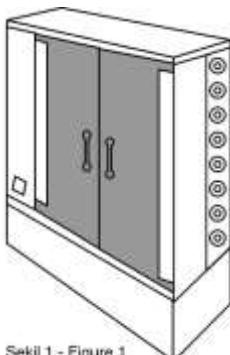

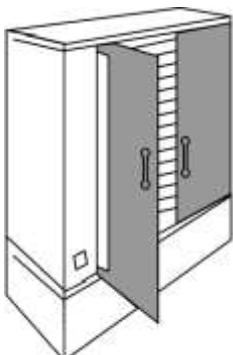

The gasket is removed and cleaned. Or if necessary replace new gasket.

ELECTRICAL CHICKEN ROTISSERIE

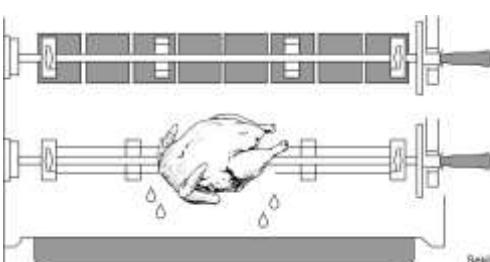

F TROUBLESHOOTING

THE APPLIANCE DOESN'T OPERATE	1. Check if the appliance is plugged in. 2. Check the electrical connections and voltage. 3. Check if the fuse is on or off.
THE APPLIANCE STOPPED	1. The appliance can stop due to low voltage.In this situation check the voltage. <ul style="list-style-type: none">• If chicken rotisserie is not done at suitable quality• If any function of security doesn't work,<ul style="list-style-type: none">➢ Do not use the appliance.
*If these problems are still going on, contact with our authorized services.

ELECTRICAL CHICKEN ROTISSERIE

I ELECTRIC CIRCUIT SCHEMA

CR-3E

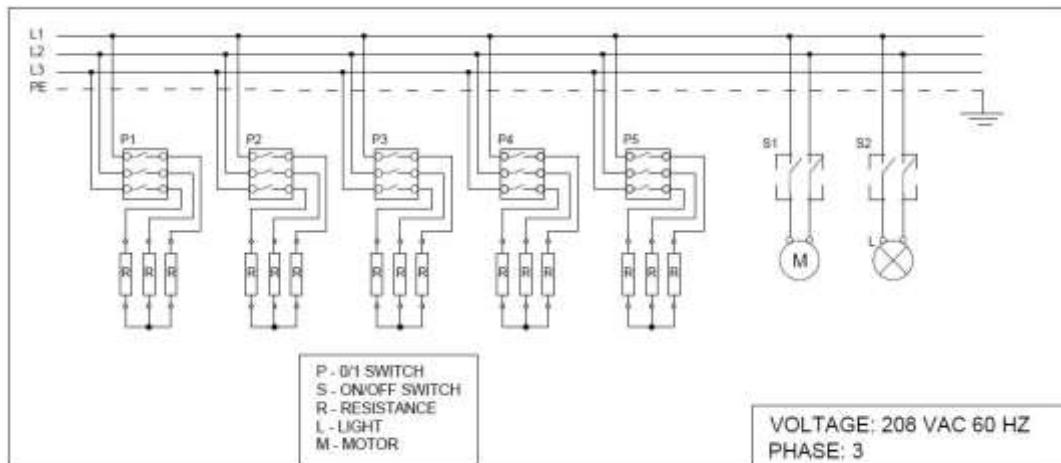

P - 0/1 SWITCH
S - ON/OFF SWITCH
R - RESISTANCE
L - LIGHT
M - MOTOR

VOLTAGE: 208 VAC 60 HZ
PHASE: 3
