FireMixer-14

Continuing a Legacy of Excellence for the Modern Kitchen

For generations, Savage Bros has set the standard for confectionery machinery. Today, we are proud to announce that our flagship FireMixer-14 (FM-14) has been improved to meet the needs of modern kitchens.

The updated FM-14 has been redesigned with advanced safety features, ensuring even greater protection for your kitchen and products. It delivers the same reliable performance you've trusted for years, so you can continue crafting high-quality candies and other confectionery products for your loyal customers.

Dual-Lid System

Improved Features for Enhanced Food Safety

The new FireMixer-14 features a dual-lid system that provides greater control and enhanced food safety. It allows you to fully close the kettle to lock in moisture and prevent over-drying, or keep it vented throughout the cook as needed—both modes allow for flexibility depending on your recipe.

The new FM-14 remains seamlessly integrated into your current workflow, protecting your product's integrity and supporting products that meet modern food safety standards.
