

### ELEVATED DESIGN. ADVANCED PERFORMANCE.

Davanti by Frieling placemats combine sophisticated style with innovative functionality.

**Embedded copper nanoparticles** help reduce contamination, providing invisible yet powerful protection. Designed for effortless maintenance, each placemat wipes clean easily and features a **naturally anti-slip surface**. The “Mattola” style is even commercial dishwasher safe.

Available in a wide range of beautiful designs and colors, Davanti by Frieling placemats enhance any table setting—from residential dining to hospitality and institutional environments. Expertly crafted for lasting durability, DAVANTI placemats ensure a flawless presentation with **edges that never fray**.

Manufactured in Chile in a state-of-the-art facility, these placemats are produced using high-quality, phthalate-free materials specially formulated for food contact. Fully recyclable and responsibly made in a solar-powered plant, they reflect a commitment to quality, sustainability, and modern design.

### Copper is scientifically smart

We incorporate copper nanoparticles directly into our extrusion process to deliver powerful, proven antimicrobial performance—built right in, not applied later.

Scientific studies show that copper can **eliminate up to 99.9% of harmful bacteria**, including *E. coli* and *MRSA*, within just two hours of contact. In recognition of this effectiveness, the U.S. Environmental Protection Agency (EPA) has officially registered copper as the **first and only solid antimicrobial material**.

Unlike coatings that wear off over time, copper’s antimicrobial properties are continuous and long-lasting. That’s why copper surfaces are trusted in hospitals and laboratories—and why they’re now being adopted by forward-thinking restaurants that prioritize cleanliness, safety, and innovation.

#### CARE INSTRUCTIONS

Our vinyl placemats are designed for everyday use and are resistant to spills, making them easy to clean. However, certain substances, such as tomato sauce, curry, red wine, coffee, and highly pigmented foods or inks, may cause staining if left on the surface for an extended period. These stains do not affect product performance but may alter appearance.

#### Use & Care:

- Clean promptly to keep placemats looking their best
- Wipe clean with a damp cloth and mild soap
- Avoid bleach, harsh cleaners, or abrasive scrubbers
- Do not fold or roll – only store flat
- Only MATTOLA is *commercial* dishwasher safe – not for use in residential dishwasher
