

GLUTEN STATEMENT

October 6, 2017

Gluten is a protein found in wheat, barley, rye, kamut, spelt, and triticale, otherwise known as “prohibited grains”.

To the best of Fruit Fillings Inc. knowledge, all products manufactured by Fruit Fillings, Inc. are gluten free. The majority of our products are stabilized using modified cornstarch; only a few specialty products use potato or tapioca starches as stabilizers.

Fruit Fillings, Inc. warehouses are entirely gluten free, eliminating a remote chance of cross contamination.

Should you have further questions regarding gluten or specific products, please do not hesitate to call. We welcome all inquiries.
