

# GET Eco-Takeouts®

## Care & Handling

Eco-Takeouts® are the original reusable to-go food containers introduced by G.E.T. They're an excellent, environmentally friendly alternative to disposable takeaway food containers.

## Microwaving

Eco-Takeouts® are safe for reheating in one- to two-minute bursts, but not for cooking or thawing. Exposing your Eco-Takeouts® to a high heat environment can shorten their service life.

## Cleaning

As with all polypropylene products on the market, it's best to rinse them immediately after use. This helps to avoid buildup of residue from foods. Do not use scour pads or any kind of steel wool or metal scrubber.

## Do's and Don'ts

### Handling

#### Do

- Handle with care
- Reheat in microwave for one- to two-minute increments

#### Don't

- Drop, strike, or throw
- Cook or thaw food

### Cleaning

#### Do

- Rinse as soon as possible
- For best results, soak for at least 10 minutes in mild, bleach-free soap
- Use soft cloths or sponges to remove food

#### Don't

- Use scour pads, steel wool, or any kind of metal scrubbers
- Use bleach or bleach-based detergents or cleansers

### Dishwashing

#### Do

- Place in correct pegged dishwashing rack, reasonably spaced out
- Ensure all detergents and chemicals used in the washing process are bleach-free

#### Don't

- Overload
- Stack containers on top of each other
