

# Horizon™ Ice Machines

## Exclusive RIDE® technology

### RIDE technology pushes ice-through-a-tube; the best way to auto-fill any dispenser

Enhance your customers' experience

- Remove ice machine heat and noise from fountain area
- Present a more attractive fountain area – ice machine mounts anywhere to locate it out of customer's view
- Eliminate disruption to customers – no waiting while employees are filling dispenser

Use your valuable space more efficiently by relocating the ice machine to a back room.

Present an upscale fountain area with Follett Vision™ dispensers

## Lowest cost to own & operate

- Reduce water consumption by over 30%
- Reduce electrical costs compared to most cube-type ice machines
- Reduce labor costs
  - Clean dispensers faster without ice machine on top
  - Clean ice machine in half the time
  - Eliminate labor required to transport ice to dispenser

Horizon's evaporator

Operates continuously to reduce water and electrical usage

Cube evaporators

The ice making system must reverse and melt ice to release cubes – uses more water and energy

## Improve safety & sanitation

- Reduce potential for contamination – less ice handling
- Sanitize dispensers more thoroughly – full access to ice storage area without ice machine on top
- Reduce risk of slips and falls – no spilled ice
- Reduce strains – eliminates need to carry and lift heavy buckets of ice

"Cleaning and sanitizing is so much easier without an ice machine on top of our dispenser!"

## Ice Manager™ diverter valve system

The newest innovation in RIDE technology – fills two dispense points with one ice machine.

Manages the ice so you don't have to

- Ice delivery based on demand delivers ice when you want it, where you want it
- Fewer ice machines to purchase and maintain
- Use your production capacity more efficiently

## Chewblet® ice

Your customers love Chewblet ice! Follett offers the original Chewblet ice (approx. 1" (25.4 mm) long) and Micro Chewblet ice (approx. 3/8" (9.5 mm) long).

- Up to 70% prefer it over cube ice\*
  - Easier to chew
  - Better size and shape
- Up to 30% will buy more fountain drinks\* when they have Chewblet ice
- Many will actually go out of their way for this ice

You'll love the increased profits!

- Increases sales of high margin fountain drinks
- Superior drink displacement lowers drink costs
- Increases profits from packaged ice programs by selling bagged Chewblet ice

Plus, you get the same drink and coldplate performance as cube ice.

*"I've been going to  
(my local drive-thru  
restaurant) on my lunch  
hour almost every day for  
the past year just to get  
Chewblet ice"*

*"I fell in love with  
Chewblet ice!  
It's chewable, tastes great  
and makes my drink fun"*

*"My family loves the ice  
so much that I bring home  
a bag and keep it in the  
freezer for the kids"*

\* Consumer study conducted by independent agency Roper ASW.

## Engineered for reliability

- Three year parts and labor warranty on entire machine with 5 year compressor parts warranty
- Designed for enhanced performance and machine life
  - Automatic self flushing prevents buildup of impurities
  - Advanced auger design reduces icemaking loads by over 80%

## Easy cleaning and sanitizing

- Push button operation – just add cleaning or sanitizing solution, the ice machine automatically cleans, flushes and returns itself to service
- Clean ice machine in half the time

Horizon ice machines also work in traditional top-mount applications

Horizon ice machines with RIDE technology eliminate ceiling constraints – get more storage capacity for the same floor space
