

IEP Safety + Security Solutions

BULK STORAGE LOCKERS: Secure equipment and valuables. Fast set-up and easy reconfiguration provides maximum flexibility.

SAF-T-GAS™ CABINET: Protect gas cylinder tanks from unauthorized access. Powder coated in safety yellow and OSHA compliant.

PAIR GATE (open): Provide security on dock doors, garages or any large opening up to 24' wide. Gates collapse and pivot for clearance of tracks and bollards.

SINGLE GATE: Secure receiving doors to high-traffic hallways up to 12' wide without sacrificing visibility or air circulation.

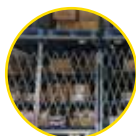

MULTI-DOOR VUE™ LOCKERS: Five individual lockers provide flexibility in any industrial setting. Ships fully assembled.

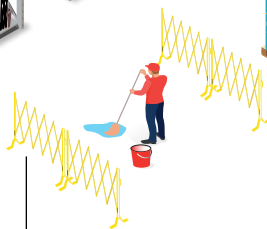

PAIR GATE: Heavy-duty security for warehouse, manufacturing, industrial and retail environments.

PORTABLE ACCESS CONTROL GATES: Section off areas up to 12' wide in any industrial, retail or public space. Gates fit through doorways and rollaway for easy storage.

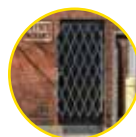

PAIR GATES: Limit access to inventory on racking with heavy-duty pair or single gates. Customize to suit any need.

PORTABLE AISLE GATES: Create temporary access control in any area up to 7' wide. Easy to collapse and light enough to carry.

PORTABLE BARRIER GATES: Secure areas up to 12' wide while allowing multiple entries. Use in any industrial, warehouse or retail environment.

DOOR GATE: Secure pedestrian entrances up to 4' wide with heavy-duty folding gates that operate like a door.

SINGLE GATES: Secure any window or storefront, with heavy-duty single or pair folding gates.

SINGLE GATES: Create access control to aisles in warehouse, industrial and retail settings. Custom sizes and colors available.

VUE™ LOCKERS: Provides organization, storage and visual inspection. Holds up to harsh industrial settings. Ships fully assembled.
