SDS - Safety data sheet	Available upon request	
Stock	Fully stocked	

1 Anasphere Plus™ is engineered to be positively charged which allows our product to attach to the negatively charged outer cell walls of microbial pathogens, ultimately inactivating them.

2 EPA Scale: 4=too low toxicity, 3=recommended, slight level of toxicity, 1=very high toxicity

3 It is recommended to use PPE given the severity of this pandemic. It is not only the chemical you are protecting yourself from inhaling or getting into your eyes, but you do not know if the area could possibly be contaminated with a bacteria or virus.

4 PPM: Particles per million
