

NOBLE CHEMICAL LOW TEMP SAN DISH WASHING MACHINE SANITIZER

FOR USE ON:

Stainless steel
Glass
China
Porcelain
Plastic

***not recommended for use on:**

Sterling silver
Silver plate
Other corrodible soft metals

DESCRIPTION:

Noble Chemical Low Temp San is a dishwashing machine sanitizer that is designed to keep your dishes and utensils clean and free of bacteria, viruses, and fungi! This product is specially designed for low temperature dish washing machines with a minimum final rinse temperature of at least 120 degrees Fahrenheit.

DIRECTIONS:

This product should be automatically injected during the beginning of the "final rinse" portion of the dishwashing machine's operating cycle. Use approximately 4 to 7 cc's per gallon of water to achieve a level of approximately 50 to 100 ppm available chlorine as measured with a chlorine test kit. Please consult local sanitation regulations for specific requirements.
