**UNIVERSITY
ON-SITE LAUNDRY**

¹Pre-soaked laundry, when used as directed.

²Pre-soaked laundry when used as directed, following special instructions for decontamination against HIV-1, HBV, and HCV on surfaces/objects contaminated with blood/body fluids:

Personal Protection: When handling items soiled with blood or body fluids, use disposable latex gloves, gowns, masks, and eye coverings.

Cleaning Procedures: Blood and other body fluids must be cleaned from items before application of this product.

Pre-Soak to Disinfect: Pour 2 capfuls each to line 1 into one gallon of cold water. Submerge completely and soak items for 15 minutes. Rinse thoroughly with clean water or machine wash as directed.

Contact Time: Submerge completely and soak items for 15 minutes to kill HIV-1, HBV, and HCV.

Disposal of Infectious Materials: Blood and other body fluids must be autoclaved and disposed of according to local regulations for infectious waste disposal.
