

How to Use

Place the Hold-Fast® Refillable Glue Trap in an area where you've noticed rodent or insect activity, especially along walls or around appliances where they frequently travel or hide. Slide or pop board out of the tray once you have caught a pest. Be sure to monitor the glue trap each day to check if you've made a catch. Then, dispose of the board and its contents in the trash.

If you would rather humanely release the rodent(s), apply vegetable oil to the board and use the blunt end of a pencil to release the mouse. Then release the mouse a safe distance from your home to prevent it from returning. Refill the trap with a fresh pre-baited board and place again to keep those pests under control. Do not place in areas where birds or non-target animals may come in contact with the glue.
