

## How to Use

1. Remove the mouse poison bait station from packaging.
2. Place bait station flat side down on the floor in areas where you've seen signs of mice. Make sure the location is inaccessible to children, pets, or domestic animals.
3. If using more than one bait station, place them approximately 8 to 12 feet apart.
4. Continue baiting until at least 4 days have passed without signs of new feeding activity.
5. Follow up: Wearing gloves, collect and properly dispose of dead rodents and leftover bait.
