

ADA PATHCADE™ BARRICADE

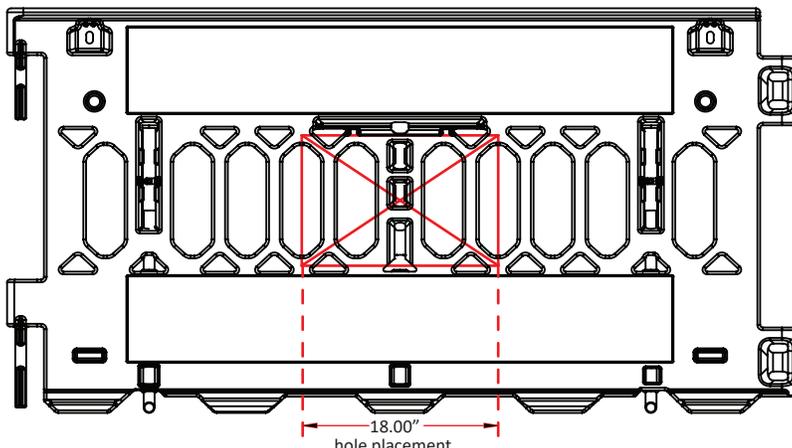

General Instructions:

The Pathcade has a tri-pod leg system, two long feet on one side of the barricade and one smaller, anti-trip foot on the other side of the barricade.

When all three feet are deployed, no sandbags are needed. Turn handles on both sides of the barricades to deploy feet.

Instructions For Creating An ADA Pathway:

When creating an ADA compliant pedestrian pathway, only deploy the two longer feet and secure with sandbags. Place barricades so that feet are not in the pathway.

Sign Area: Holds 20"W x 14"H Sign on each side (screw on)
