

DESCRIPTION:

FRYCLONE Fryer Boil-Out Cleaner works to remove baked on grease and carbon from fryers, baking ovens, cookers, and other high temperature cooking equipment. Regular cleaning of fryers with FRYCLONE will increase the life of oils by eliminating causes of rancidity. DO NOT use on aluminum.

DIRECTIONS:

Drain all contents from fryer. Rinse fryer with hot water to remove excess undrained fat. For a fryer holding approximately 30 lbs. of fats or oils, fill with cool water to within 3 to 4 inches of top. Add 8 ounces of FRYCLONE Boil-Out Cleaner (use proportionately more or less depending upon the size of the fryer). Boil slowly for 20 minutes. Terminate the boil and use a long handled, heavy duty brush to clean interior of the fryer. Drain the fryer, then rinse thoroughly to remove all residue. In subsequent operations, less boiling time is required to perform this cleaning operation, and the amount of FRYCLONE may be cut in half.

CAUTION: AVOID SKIN CONTACT. Safety gloves/apparel should be worn when handling/using this product.
