

Cope Performance Blend™

ice melter with CMA

Coated to jump start melting
Fast and long lasting
Works down to -25°F

Proprietary formulation engineered
for Mid-Atlantic region

Cope Performance Blend Ice Melter a proprietary formulation for the Mid-Atlantic Region is a formulation of potassium chloride (a fertilizer), calcium chloride, magnesium chloride, and sodium chloride. The product is coated with a liquid magnesium chloride/CMA mixture to help “jump start” the melting process. **Cope Performance Blend Commercial Ice Melter will melt more snow and ice than most other products.** It works faster and at temperatures when many other products have stopped working.

Cope Performance Blend Commercial Ice Melter is formulated to be seen when used. Most ‘white’ ice melt products disappear into snow and ice. Users tend to over-apply, or worse, under-apply product because they can’t see where it lands. Additionally, in today’s litigation-driven society, Cope Performance Blend Commercial Ice Melter affords users positive proof that an ice melter is in use.

Because Cope Performance Blend Commercial Ice Melter melts more efficiently than other products, a smaller quantity is needed to remove snow and ice, minimizing the environmental impact on grounds and vegetation.
