

# PASS-THROUGH SHELF INSTALLATION

09/2021

## CONTENTS INCLUDE

Pass-Thru Shelf

Angle or Cantilever Brackets

#14 Screws (for attaching brackets to shelf)

*Mounting hardware is not included.*

## TOOLS REQUIRED

Drill with Assorted Bits

3/8" Socket

Level

Screws (for mounting the brackets to the wall)

Pen or Pencil

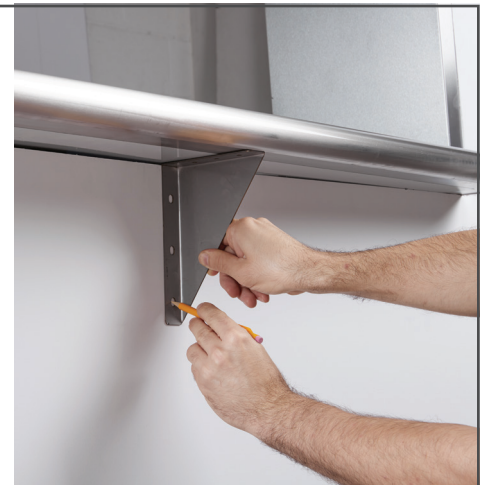

1

Place the shelf in the pass-thru opening where it will be installed. Use the level to ensure it is flat.

2

Position the included brackets beneath the shelf and against the wall (2 L-shaped brackets for 18" wide shelves or 6 cantilever brackets for 24" models). Use a power drill to screw brackets into the wall (mounting hardware sold separately).

# PASS-THROUGH SHELF INSTALLATION

3

Use a pen or pencil to mark where the underside of the shelf will attach to the brackets

4

Remove the shelf from the pass-thru opening and turn it upside down. Placing the shelf on a flat surface, drill 13/64" holes into the bottom of the shelf where marked.

5

Reposition the shelf into the pass-thru opening and align the drilled holes in the shelf with the holes in the brackets. Use the #14 screws to secure the shelf to the brackets.
