INTRODUCTION

Satellite portable restrooms must be assembled according to approved assembly procedures. Avoid variations in assembly procedures which could adversely affect product life and warranty.

PREASSEMBLY: INSPECT ALL ITEMS FOR DAMAGE, VERIFY QUANTITIES ARE CORRECT (page 4)
READ THROUGH ENTIRE INSTRUCTION BOOKLET

IMPORTANT:

Do not remove shipping screw from door until instructed.

TOOLS:

- CORDLESS DRILL
- 3/8" HEX DRIVER
- #10 (5mm) DRILL BIT
- POP RIVET GUN
- #2 PHILLIPS SCREWDRIVER
- #4 PHILLIPS SCREWDRIVER

HELPFUL HINTS:

- **KEEP WORK AREA ORGANIZED.**
- Do not open all kit boxes, open only enough to assemble the toilets you are currently working on.
- Use toilet paper holders for parts bins on multiple unit assembly
- The assembly procedure is written for assembly of a single unit. If assembling multiple units, considerable efficiency can be gained by having a crew work in assembly line fashion.
- An apron with large pockets is handy for holding parts and tools.

All references to left, right, front and rear correspond to this illustration.
