

Electric Strip Warmers

Mounting Brackets included with 1" spacing that can be installed directly into overshelves, optional support chains (sold separately)

Heavy-duty stainless steel housings do not sag and are durable for busy kitchen environments

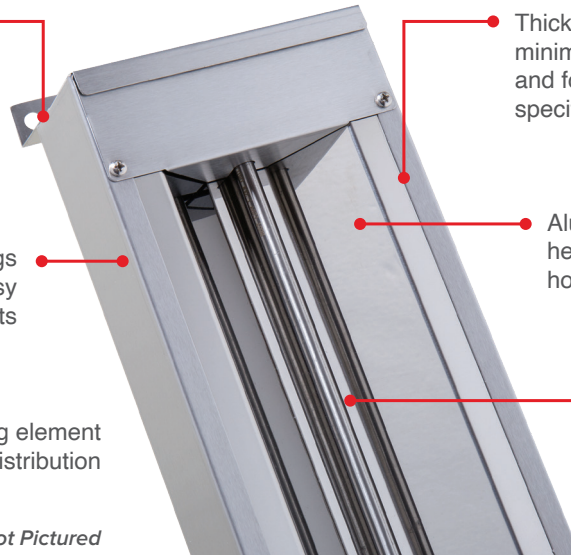

Metal guards* support heating element without affecting heat distribution

**Not Pictured*

Thick insulation minimizes heat loss and focuses heat in specific area

Aluminum reflector retains heat intensity and directs to holding surface

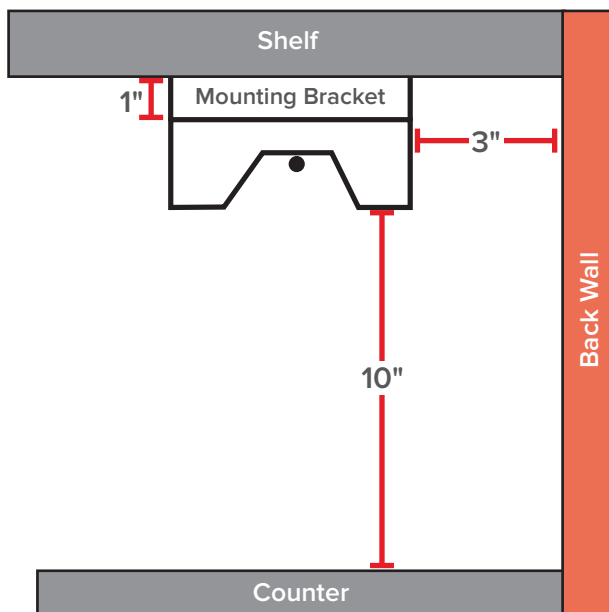

Durable sheathed element maintains peak serving temperatures without drying out food

Infinite control allows for ultimate customization of heat intensity for an ever-evolving menu, while the toggle control allows for easy on/off usage.

CLEARANCE GUIDE

Minimum Clearance Requirements for Non-Combustible and Combustible Surroundings
