

NOBLE CHEMICAL SIERRA CARPET RINSE & ODOR NEUTRALIZER

FOR USE ON:

All carpet fibers including wool

DESCRIPTION:

This product is used to rinse the carpet after extraction cleaning, shampooing, or bonnet buffing. It is excellent for coffee, tea, and light rust stains. This product also helps keep extraction machine jets clear to reduce carpet streaks!

DIRECTIONS:

There are three ways this product can be used:

1. Most carpet manufacturers' cleaning recommendations state that the carpet should be sprayed using a pre-spray, or an extraction product on the carpet, allowing the chemical to sit for 3-5 minutes to emulsify any grease, soil and dirt. Then follow up by diluting Rinse & Odor Neutralizer in the extraction machine, 2-3 oz. per gallon of water. Proceed to rinse.
2. Dilute Rinse & Odor Neutralizer in a sprayer at a 2-3 oz. per gallon ratio and lightly mist over the previously cleaned carpet, then allow it to dry.
3. To remove chemical build-up on extremely soiled carpets, dilute Rinse & Odor Neutralizer in an extraction machine, 2-3 oz. per gallon of water, and rinse the carpet before extraction, shampooing or bonnet buffing. Always test an inconspicuous area to determine colorfastness.
