NSF Installations require all set screws must be filled with an approved silicone sealer. *Silicone not included.*

### INSTALLATION

1

Lay the top shelf flat on the box to protect the finish during assembly. If the table includes a back splash, support the top with (4) 4" wood blocks to each corner (Figure 1).

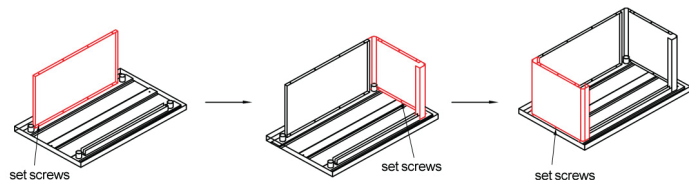

Fig .1

2

Install the back and sides on the Table Top, then insert set screws and tighten the screws (Figure 2).

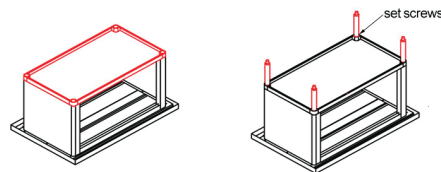

Fig .2

3

Line the undershelf up with the holes and inserts the legs into the gussets. Tighten set screws (Figure 3). Tighten set screws.

Fig .3

4

Turn table upright and install the sliding doors on the slide rails (Insert top rail first) (Figure 4). Remove protective plastic film.  
**Final Assembly.**
