<b>FD&amp;C Yellow #5 &amp; #6:</b> tartrazine (#5), orange yellow S (#6)	NO	YES	YES	

Allergen Control: All plants manufacturing SensoryEffects® Powder Systems' products have allergen control programs in place to prevent cross-contamination with allergens used on the same line or in the same plant. Highly refined vegetable oils used in our products are considered to be non-allergenic. All products that contain soy lecithin are labeled as such; however, based on expert opinion, we do not perform allergen clean-outs on shared equipment after using soy lecithin. Customers will be notified of significant changes that affect the allergens present in the product.
