

TERRO®

Pantry Moth Traps

GENERAL:

Use the TERRO® Pantry Moth Traps in areas where moths have been observed. These areas may include the pantry, kitchen, basement, or garage. TERRO® Pantry Moth Traps include two individually wrapped powerful pheromone lures designed to attract the most common moths. The airtight packets keep the lures from releasing attractant prior to use.

DIRECTIONS:

- 1 Pre-fold trap on fold lines (illustration 1).
- 2 Remove paper backing from the glue surface of the trap (illustration 2).
- 3 Open the lure package (illustration 3). Use one lure for each trap.
- 4 Gently press the lure into the center of the trap (illustration 4).
- 5 Re-fold the trap along the fold lines, forming a tent (illustration 5).
- 6 Place the traps on shelves in the area where moths have been observed such as the kitchen or pantry.

For best results, replace TERRO® Pantry Moth Traps every 3 months or if the trap becomes dusty or full of moths.

TERRO® Pantry Moth Traps are an excellent way to attract and kill moths. TERRO® Pantry Moth Traps will attract and kill grain moths, meal moths, and seed moths. These include the Indian Meal Moth, Tobacco Moth, Almond Moth, Mediterranean Flour Moth, and the Raisin Moth.

Non-Toxic

Highly Effective

Keeps grain loving pests out of the pantry
Safe & Pesticide Free
