## **ASSEMBLY INSTRUCTIONS FOR**

**T624-24", -27", -40"**

## **CELLO / CUTTER BOX DISPENSER**

1. Secure both feet to the unit's base using four #10-24 x 1/2" machine screws, four #10 lock washers, and four #10-24 hex nuts.
2. The 6-Roll Dispenser comes supplied with four small rubber grommets to be installed in the holes on the end of each foot. (These holes can also be used to mount the unit to a table or counter top. Mounting hardware is not included.)
3. Slide a black cutter head with two-way cutting blades onto any track. Use one #6-32 x 3/4" machine screw and one #6-32 nylock nut on each end of the track to act as stops for the black cutting head. Be careful not to torque the nylock nut too tightly or else the track will compress and the cutting head will not slide as easily as it should.
4. Repeat step 3 for the remaining five cutting stations.
5. Load rolls onto the wood dowels feeding paper from over the top.

### **HARDWARE PACK**
