

Original Spit

New Touch-N-Stop Spit

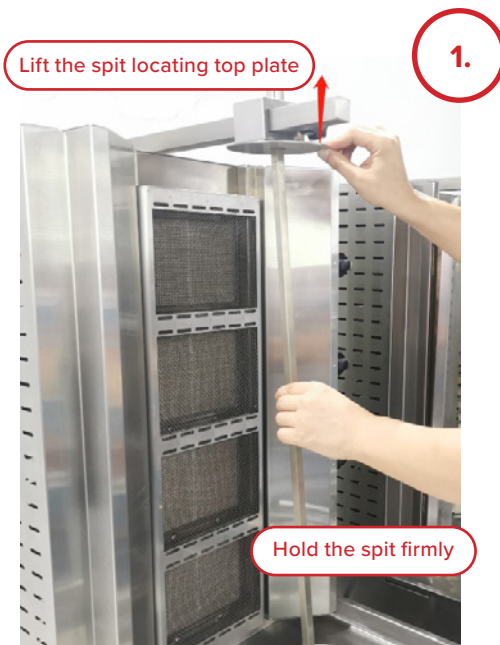

Touch-N-Stop Spit & Spit Base

If your vertical broiler has the old-style spit base without the touch-n-stop slip clutch design, and you need to replace the spit or want to upgrade to the new design, please purchase the compatible assembly and follow the instructions below. If the base of your spit is square, then it is the old-style. If it is circular, then it is the touch-n-stop.

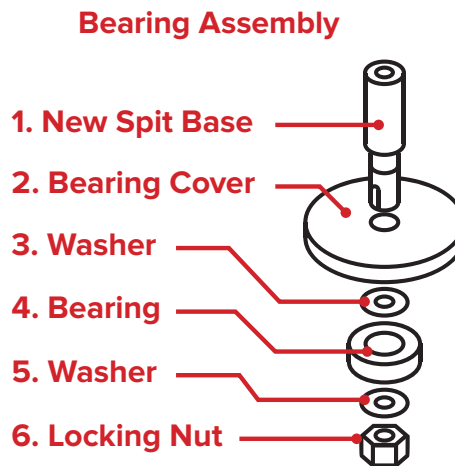

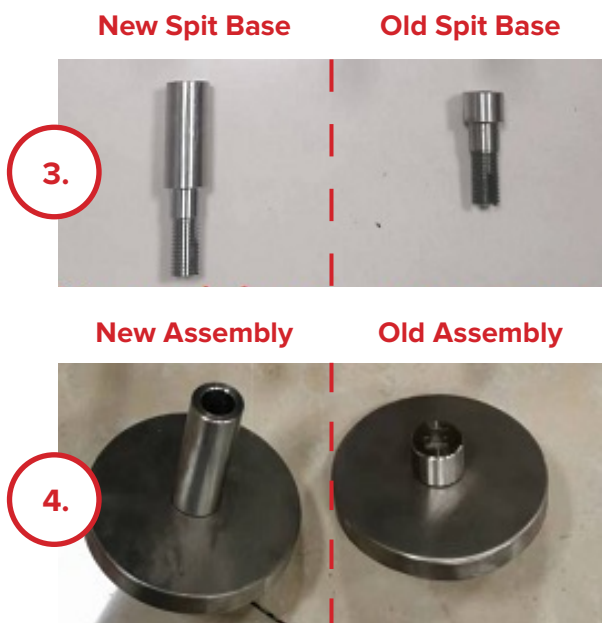

NOTE: The touch-n-stop design allows you to gently stop the spit while shaving the meat without damaging the motor.

MODEL	DESCRIPTION	SPIT ASSEMBLY
177VB202	Avantco VB202 Gas Vertical Broiler	177VB267SPITKT
177VB203	Avantco VB203 Gas Vertical Broiler	177VB367SPITKT
177VB204	Avantco VB204 Gas Vertical Broiler	177VB467SPITKT
177VB205	Avantco VB205 Gas Vertical Broiler	177VB567SPITKT

1. Hold the spit firmly with left hand and lift the spit locating top plate with the right hand to the maximum height.
2. Pull the spit out of the bottom spit base and move the spit a little bit forward. The main spit would be taken out.

- 3–4. The spit base should also be upgraded to match the new spit. Dismantle the spit base with bearing assembly step by step in the sequence as pictured below. Replace the new longer spit base and assemble the spit base with the bearing in the sequence as pictured below.

5. After the assembly of the new spit with bearing, please put the spit base back. Make sure the spit base slot sits well on the motor shaft. Rotate the spit base and make sure the spit base assembly does not turn.

6. Now install the new spit and meat base.
