

Melamine Care and Use Instructions

VOLLRATH MELAMINE CARE AND USE

- Before using for the first time, remove all labels and wash in hot soapy water to remove any residue on the item.
- If label adhesive remains on product, wipe off with WD-40® and clean with warm soapy water and rinse thoroughly.
- Do not use in microwave or other ovens. Do not use with gel fuel or other heating device.
- Temperature rating is between -4°F (-20°C) and 158°F (70°C).
- Use only on stable surfaces.
- Do not use ammonia based cleaners. Do not use abrasive materials, scratching cleansers or scouring pads to clean the unit. These can damage the finish.
- Vollrath recommends that after each use hand wash item with hot soapy water and rinse thoroughly. Use only non-abrasive cleaning pads. Avoid using chlorine or chlorine based detergents
- Vollrath melamine may be washed in a commercial dishwasher. Follow the dishwasher instructions and guidelines for cleaning melamine. Avoid using chlorine or chlorine based detergents.
- Store items in an organized manner with a coffee filter or paper towel between items to avoid scratches.
