Inteplast Group Corporation-AmTopp Division Product Warranty

Inteplast Group Corporation-AmTopp Division is ISO-9001:2008 Certified and manufactures stretch film in accordance with ASTM standards to meet the most demanding applications in the market place. AmTopp Division's internal specifications are the most rigid in the industry and guarantees that all stretch film products will meet these specifications and standards.

AmTopp Division's goal is to manufacture the most consistent highest quality stretch film product in the industry. Our daily product quality control has systematical procedures to ensure the highest quality and consistent stretch film products by controlling raw material quality, auditing the film extrusion process and continual product testing to these specifications before shipping any product.

AmTopp Division's ongoing internal Continual Improvement Initiatives ensures that the product(s) our customers receive and utilize will meet and exceed industry standards.

Scott Stevens
Sr. Director Technology and Business Development
