

# CHEMICAL COST COMPARISON

## WIPESPLUS® MULTI-TASK SYSTEM VS. RED BUCKET SYSTEM

# CHEMICAL COST PER MONTH / 1 LOCATION

## MULTI-TASK SYSTEM

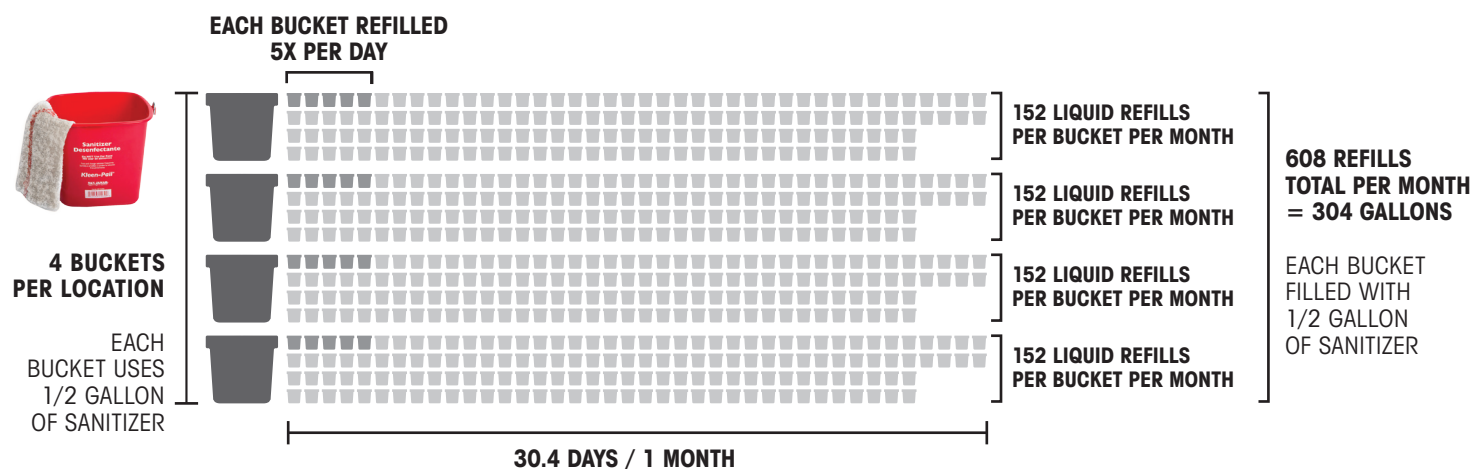

\*BASED ON 4 BUCKETS PER LOCATION

10 GALLONS OF SANITIZER USED PER MONTH

10 GALLONS PER MONTH  
x \$0.071 PER GALLON  
**\$0.71 PER MONTH/1 LOCATION**

\*CHEMICAL COST: \$0.071 PER GALLON

## RED BUCKET SYSTEM

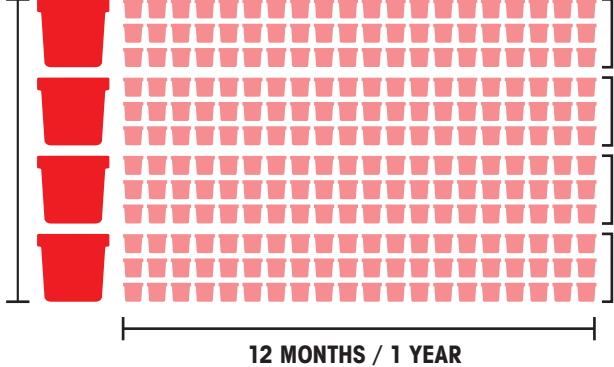

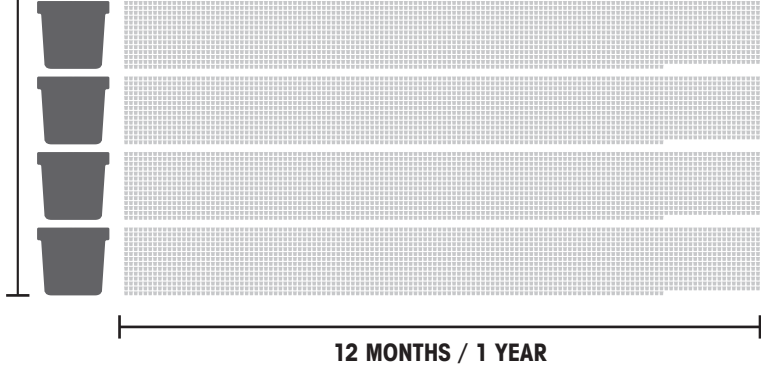

\*BASED ON 4 BUCKETS PER LOCATION

304 GALLONS OF SANITIZER USED PER MONTH

304 GALLONS PER MONTH  
x \$0.071 PER GALLON  
**\$21.58 PER MONTH/1 LOCATION**

\*CHEMICAL COST: \$0.071 PER GALLON

# CHEMICAL COST PER YEAR / 1 LOCATION

# FEATURES & BENEFITS OF THE MULTI-TASK SYSTEM

- 1.) The WipesPlus Multi-Task Closed Bucket system was developed to replace the “Red Bucket and Rag System” to greatly reduce cross contamination and to be more compliant with the Health Code guidelines in proper sanitization of surfaces.
- 2.) The WipesPlus Multi-Task Closed Bucket System allows you to use your current dilution system and the same chemicals that you were using in the “OLD SYSTEM”.
- 3.) The WipesPlus Multi-Task Closed Bucket System can be used with any chemical and can be used in the front of the house or by using a quat sanitizer can be used in the back of the house on any food contact surfaces (cutting boards, meat slicers, cutting utensils, etc.)
- 4.) The WipesPlus Multi-Task Closed Bucket System was created to improve on traditional cleaning methods and minimize Health Code Violations. Conventional red and green sanitizing buckets need to be changed every two to three hours (Proper Health Code Guidelines) and checked for proper efficacy to insure proper sanitization.
- 5.) The “Old System,” because it has to be changed every 2 to 3 hours, allows too much room for human error and takes time away from an employee(s) doing other tasks that could help make your employees more effective and efficient using that time helping in the prep area, at the register, carry out or cleaning tables.
- 6.) The WipesPlus Multi-Task Closed Bucket System only needs to be refilled when the Refill Roll is gone (on average most buckets go thru 4 refill rolls per month). The testing for this product shows we are compliant with the Health Code Guidelines up to three months.
- 7.) It's durable polyester wipes release the correct amount of chemical on the surfaces to ensure proper sanitization, while the enclosed lid system helps prevent cross contamination because no air gets in and you are not putting a dirty rag back into the sanitizer.
- 8.) This system also drastically lowers costs by using less cleaning solution, cutting down on laundry needs and greatly reducing staff labor. Adopt this innovative WipesPlus Multi-Task Closed Bucket System to give you Peace of Mind that you are compliant with the Health Inspectors, from an employee and customer perception this system shows you care, and at the end of the day you will save money.
