WJX80X* PULP EJECT JUICE EXTRACTOR

WHAT'S NEW!

Juice Extraction Rate =
169qt/160L per hour

FRESHENED UP WITH THESE NEW FEATURES!
TO IMPROVE EFFICIENCIES, FUNCTIONALITY AND DURABILITY

WJX80XP

New Food Pusher

WJX80XLID

New Cover
with 3.15-inch
chute opening

WJX80XBKT

New Shredder
Basket with
Coupling

Redesigned pusher

is much more ergonomic and easier to hold for high volume juicing.

Larger 3.15-inch feed chute opening

means less prep time for operators.

On/Off switch guard

helps to keep switch clean and functioning properly.

Redesigned internal basket coupling

improves durability and makes the basket easier to remove.

WJX80X PULP EJECT JUICE EXTRACTOR

FAQ'S

1. Q: Can I use the old pusher (WJX80P) with the new cover (WJX80XLID - larger chute opening)?

A: No! If you attempt to use the old pusher with the new 3.15-inch opening, the pusher will hit the cutting basket and can become unsafe.

*ONLY use the old pusher with the old cover and the new pusher with the new cover.

2. Q: Can I use the new food pusher (WJX80XP) with the old cover (WJX80LID)?

A: No! If you have a WJX80, the new pusher will not fit into the WJX80LID cover as the pusher will be too wide for the chute opening, – HOWEVER, there is a Solution! See Question 3.

3. Q: Can I use the new pusher (WJX80XP) and new cover (WJX80XLID – larger chute opening) with my original WJX80?

A: Yes! You can retrofit the new pusher and cover to your WJX80 by purchasing the 2 new accessories together.

4. Q: Why did the pusher style change?

A: The new pusher was designed to be more ergonomic and easier to grip to allow for more high-volume juicing.

5. Q: Why did the shredder basket coupling design change?

A: Field testing at a heavy-duty chain revealed an issue with the shredder basket getting stuck to the housing. We redesigned the shape of the coupling and improved the concentricity of the basket to prevent this from occurring.
