| <u>POTENTIAL HEALTH EFFECTS:</u> | |
|---|--|
| Eyes: | This product is minimally irritation to the eyes upon direct contact. |
| Skin: | This product is minimally irritating to the skin upon direct contact. NOTE: Neomycin sulfate and Bacitracin Zinc USP may cause cutaneous sensitization. A precise incidence of hypersensitivity reactions (primarily skin rash) due to topical Neomycin and Bacitracin Zinc USP is not known. Discontinue promptly if sensitization or irritation occurs. |
| Inhalation: | This product has a low vapor pressure and is not expected to present an inhalation hazard at ambient conditions. Caution should be taken to prevent aerosolization or misting of this product. |
| Ingestion: | Do not ingest. This product is practically non-toxic by ingestion. This product has laxative properties and may result in abdominal cramps and diarrhea. |
| MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: | No information available. |
| <u>CHRONIC HEALTH EFFECTS:</u> | |
| <i>Eyes:</i> | No information available. |
| <i>Skin:</i> | When using Bacitracin Zinc USP and/or Neomycin containing products to control secondary infection in the chronic dermatoses, such as chronic otitis externa or stasis dermatitis, it should be borne in mind that the skin in these conditions is more liable than is normal skin to become sensitized to many substances, including Neomycin and Bacitracin Zinc USP. |
| <i>Inhalation:</i> | Exposure to a large single dose or repeated smaller doses of petrolatum by inhalation can lead to lipid pneumonia or lipid granuloma of the lung. These are low-grade, chronic, localized tissue reactions. Shortness of breath and cough are the most common symptoms. |
| <i>Ingestion:</i> | Exposure to a large single dose or repeated smaller doses of petrolatum by ingestion leading to aspiration can lead to lipid pneumonia or lipid granuloma of the lung. These are low-grade, chronic, localized tissue reactions. Shortness of breath and cough are the most common symptoms. |

|--|---|
| SEEK MEDICAL ATTENTION FOR ALL CASES OF OVEREXPOSURE. | |
| <u>FIRST AID MEASURES:</u> | |
| Eyes: | Immediately flush eyes with large amounts of water and continue flushing until irritation subsides. If material is hot, treat for thermal burns and take victim to hospital immediately. |
| Skin: | Remove contaminated clothing. Wash contaminated area thoroughly with soap and water. If material is hot, submerge injured area in cold water. If victim is severely burned, remove to a hospital immediately. |
| Inhalation: | This material has a low vapor pressure and is not expected to present an inhalation exposure at ambient conditions. If vapor or mist is generated when the material is heated or handled, remove victim from exposure. |
| Ingestion: | Do not induce vomiting due to aspiration hazard. If vomiting should occur, lower head below knees to avoid aspiration. |
| Instructions for Physician: | Exposure to a large single dose or repeated smaller doses of petrolatum by inhalation, aspiration, or ingestion, leading to aspiration, can lead to lipid pneumonia or lipid granuloma of the lung. These are low-grade, chronic, localized tissue reactions. Shortness of breath and cough are the most common symptoms. |
