GENERAL DESCRIPTION

DRY IT SOLID is a concentrated solid rinse additive which reduces dense-water surface tension, providing rapid sheeting action for spot free drying. The excellent sheeting action of DRY IT SOLID helps to eliminate alkaline and hard water film deposits from flatware, glasses and dishware. In addition, DRY IT SOLID controls foam thereby improving the performance of the dishmachine pump. DRY IT SOLID is formulated to attain excellent results in soft to medium hard water conditions. DRY IT SOLID is ideal for use in low energy dishmachines where operating space is at a premium. The solid chemical dispensing application of DRY IT SOLID makes it efficient, safe, and economical.

PHYSICAL PROPERTIES:

Chemical composition Organic, nonionic wetting agents
 Appearance Blue solid
 pH 7.5
 Wetting Ability Instant, complete
 Foam Acts as a mild suppressant
 Odor Not residual

PACKAGING

5 lb. capsule/ 5.5 lb. gross

INSTRUCTIONS FOR USE:

DRY IT SOLID is recommended for use at a concentration between a minimum of 100 ppm (1:10,000) and a maximum of 300 ppm (1:3,000). The actual use concentration is determined by the individual operating conditions. DRY IT SOLID may be used at concentrations as low as 50 ppm (1:20,000) under ideal water conditions consisting of low water hardness and low dissolved solids levels.

Final rinse temperature should be maintained at or as close to the 180°F (82°C) minimum as possible, and should not exceed 190°F (87°C) in any case. Check the final rinse pressure and set at manufacturer's recommended level. Also, inspect final rinse for spray atomization. Adjust the rinse injector to feed DRY IT SOLID at the required concentration to achieve the rapid sheeting of water from the ware. For low energy dishmachines, set DRY IT SOLID to dispense 2-4 ml of solution per rack, in a typical soft water environment. The cam may be adjusted to allow more or less of the solution into the holding tank to accommodate varying water and soil conditions.

WARNING

KEEP OUT OF REACH OF CHILDREN. DO NOT STORE NEAR OXIDIZING MATERIAL. HARMFUL IF SWALLOWED. CONTACT WITH SKIN AND EYES MAY CAUSE SEVERE IRRITATION.

FIRST AID:

EYES: Flood with water if splashed in eyes. Flush with water for 15 minutes and consult physician immediately.
EXTERNAL: If on skin, wash with plenty of soap and water. If irritation occurs, get medical attention.
INGESTION: Harmful if swallowed. If ingested, drink large amounts of raw egg, milk, milk of magnesia or gelatin, or if these are not available, drink large amounts of water. Follow with vegetable, olive or mineral oil. **DO NOT** induce vomiting. Obtain prompt medical attention.
DECONTAMINATION PROCEDURE: Wash with soap and water.

Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.
