FRYER OIL STABILIZER & FILTER POWDER

GENERAL DESCRIPTION

With FRYCLONE FRYER OIL STABILIZER AND FILTER POWDER, the life of your fryer oil will improve with just one use, reducing replacement requirements and increasing customer satisfaction. Your fried foods will absorb less oil, making them more appealing while also saving you money, and, they'll have higher quality and improved taste as a result of lower oil absorption. All oil has antioxidants to protect the oil while it's waiting to be used. They start to burn up as the oil is used. FRYCLONE FRYER OIL STABILIZER AND FILTER POWDER replenishes that antioxidant effect to prevent the oil breakdown reactions as it is continually used.

FRYCLONE FRYER OIL STABILIZER AND FILTER POWDER is easy to use and comes in both bulk sizes and pre-portioned in packs. To use, simply add it to your hot oil before you fry, and you're done! The unique formula will help remove sediment, carbon deposits, fatty acids, and other elements from your oil while you cook.

PHYSICAL PROPERTIES:

Contains: Expanded Perlite (CAS# 93763-70-3), Citric Acid (CAS# 77-92-9)

Appearance White Powder
Stability 1 year @ ambient temperature
Biodegradable Yes
