GENERAL DESCRIPTION:

Concentrated pot & pan detergent in pre-portioned, water-soluble packets. This formula provides professional-strength cleaning while controlling costs. Use POT & PAN DETERGENT to effectively clean dishes, pots, pans, utensils, flatware, glassware, and foodservice equipment.

POT & PAN DETERGENT is premeasured and packaged in a 100% biodegradable water soluble film that dissolves completely in water. No need to measure, pour, or cut open packages. Drop one water soluble packet of POT & PAN DETERGENT in hot water. Allow your dishes to soak, then scrub and rinse clean. It's that simple.

DIRECTIONS:

For Manual Dishwashing

Pots & Pans: Use one packet in up to 5 gallons of hot water. To remove cooked-on food, soak pots, pans, and utensils in a hot water and detergent solution for 10 – 20 minutes. After soaking, scrub clean, rinse in potable water, and sanitize if necessary according to State health recommendations.

Dishes, Glasses & Flatware: Use one packet in up to 5 gallons of hot water. For best results, wash glasses before more heavily soiled items and reduce the amount of water in the sink. Change water frequently. After washing, rinse in potable water and sanitize if necessary according to state health recommendations.

For Extra Heavy Grease: Use two packets per 5 gallons of hot water and/or reduce the amount of water in the sink. Soak grease filters and very greasy pans and trays prior to scrubbing, then scrub clean.

NOTE: To estimate sink capacity, multiply the width, length and height to normal fill level (in inches), and divide the answer by 231 to get an estimate of the gallon capacity of the sink.

CAUTION: Do not remove packets from container until just before use. Do not handle packets with wet hands. Reseal container after removing packets. Store in a cool, dry place. Humidity and water will destroy the packet integrity. Keep from freezing. Do not mix with any other cleaning products.

INGREDIENTS:

The primary ingredients in POT & PAN DETERGENT are sodium carbonate, anionic surfactants, sodium chloride, and sodium aluminosilicate.

CHEMICAL CHARACTERISTICS:

Appearance.....	Pink Powder
Biodegradable.....	Yes
Corrosive Category (Concentration).....	No
Corrosive Category (Use Dilution).....	No
DEA-Free.....	Yes
Fragrance.....	Lemon
Non-Acid.....	Yes
Non-Butyl.....	Yes
Non-Flammable.....	Yes
NPE-Free.....	Yes
pH (Use Dilution).....	9.0
Phosphate-Free.....	Yes
VOC.....	Yes
