GENERAL DESCRIPTION:

Concentrated floor conditioner & neutralizer in pre-portioned, water-soluble packets. Condition floors for better sealing, to prevent leaking and powdering problems, and to neutralize odors in one quick and easy step. Add FLOOR CONDITIONER & NEUTRALIZER to rinse-water to neutralize and remove alkaline residue after floor stripping. Eliminates dulling, discoloring and hazing so floor finishes look better and last longer. FLOOR CONDITIONER & NEUTRALIZER removes brown water spots left in carpets by hard water and the white residue left by some ice melt compounds.

FLOOR CONDITIONER & NEUTRALIZER controls urine odor in restrooms. When urine odors are removed, restroom users tend to keep the area cleaner, and restroom maintenance becomes simpler and less expensive.

FLOOR CONDITIONER & NEUTRALIZER can also be used as a chalkboard cleaner. Just add 1 packet to a window wash bucket and the results will amaze you. You'll get extremely clean chalk boards in a fraction of the time, and your bucket water will remain clean and clear even after cleaning many classroom chalkboards.

FLOOR CONDITIONER & NEUTRALIZER is premeasured and packaged in a 100% biodegradable water soluble film. The packets dissolve completely in water, reducing package waste and leaving you with a solution ready for cleaning. No need to measure, pour or cut open package. This is a quick and easy way to condition and neutralize your floor. Drop one water soluble packet into three gallons of warm water. Then apply with a mop, sponge or cloth.

DIRECTIONS:

After cleaning or stripping, remove cleaning or stripping solution with mop or wet vac.

- Add one packet of FLOOR CONDITIONER & NEUTRALIZER to 3 gallons of water. Stir gently to form a uniform solution.
- Apply solution with a mop, sponge or cloth. On floors to be sealed or finished, pick up the distributed solution with a mop or wet vac, then let air dry.
- For other applications, allow surface to air dry.

CAUTION: Do not remove packets from container until just before use. Do not handle packets with wet hands. Reseal container after removing packets. Store in a cool, dry place. Humidity and water will destroy the packet integrity. Keep from freezing. Do not mix with any other cleaning products.

INGREDIENTS:

The primary ingredients in FLOOR CONDITIONER & NEUTRALIZER are citric acid and soda ash.

CHEMICAL CHARACTERISTICS:

Appearance.....	White Powder
Biodegradable.....	Yes
Corrosive Category (Concentration).....	No
Corrosive Category (Use Dilution).....	No
DEA-Free.....	Yes
Fragrance.....	None
Non-Acid.....	No
Non-Butyl.....	Yes
Non-Flammable.....	Yes
NPE-Free.....	Yes
NSF Certified.....	C1
pH (Use Dilution).....	4.5-5.0
Phosphate-Free.....	Yes
VOC.....	None
