Narcotic Cabinet #181720

The Vault is Omnimed's latest generation of Narcotics Cabinets. Security was paramount in the design of this new cabinet. Each door has a tri-bolt latch mechanism that locks into the top, bottom and opposing door. The wafer lock that controls the tri bolt latch provides a higher degree of security compared to a simple flat key lock. Forced entry into this unit would require the drilling out of the locks or the cutting of 4 harden steel bolts. The twin door design provides easy access to medications. The 4 adjustable shelves are reinforced to eliminate sagging and allow space for both large and small medication containers. The large dimensions are perfect for holding plastic storage bins up to 9" deep for quicker loading and unloading of supplies.

- American Made Stainless steel double door cabinet with 4 shelves
- Triple Bolt Wafer Lock for both doors.
- Locks are keyed differently unless specified when ordering (3 wafer keys per lock)
- Pre-drilled mounting holes reinforced with stainless steel mounting discs
- Measures 30"H X 30"W X 10"D
- Unit has lifetime warranty (1 Year On Locks)
