Tamper-Proof Screws

Non-Removable Foot Caps

Paint and Permanent Marker can be removed without damage.

These Heavy Duty, Tamper-Resistant, Folding Tables are **MADE IN THE USA**. Unlike the light duty tables from China that you will find in discount stores and on-line, these tables are designed for long life in situations where they will be subject to heavy use and/or tampering.

Available Sizes:	
18x72 Seminar	30x96
30x60	60 Round
30x72 (Standard & Anti-Microbial)	

Tops are one-piece, Waterproof, Chemical, Stain and Impact Resistant Heavy Wall Blow-Molded High-Density Polyethylene. More durable than ABS at half the cost. Tops are attached to the Frames with Tamper-Resistant Torx screws, which require a special tool to remove, a standard Torx wrench will not work.

Legs are welded and riveted. Leg caps are attached with spring steel "claws" to prevent removal for hiding contraband inside the table legs. Heavy steel "ladder" frame. Meets ANSI-BIFMA Standards, Meets California Air Quality (CARB), and CPSIA Product Safety Standards. GSA Approved.

ANTI-MICROBIAL TOP: Also available with optional Anti-Microbial Top (30x72 only) to prevent growth and spread of bacteria on table surface. Our FDA and EU approved Anti-Microbial compound is mixed with the plastic before molding. Since the protection is molded in, and not a coating, it will never wear off, wash off, or scratch off.

Disclaimer: While these tables are designed to be tamper-resistant, they are not indestructible, and are not recommended for use in maximum security environments. Correll Inc. assumes no liability for use of this product.
