### \*\*\*Testing Requirements \*\*\*

- |                                                                                                                                           |
|-------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Capacity test: Fill measuring cup with (capacity amount) of water and pour into container. Water should not exceed the measuring line. |
| 2. Visual Test: Ensure there is no dents, dirty marks, scratches, black marks, etc on product.                                            |
| 3. Wobble Test: Put on flat surface and make sure it does not wobble or spin.                                                             |
| 4. Lid Fit Test: Place lid on container to insure it fits well. 3052-L must fit 3052-B.                                                   |
| 5. Edge Check: Run finger along product to ensure there are no sharp, pointed, jagged, or excess material on product.                     |
| 6. Spill Check: Fill gallon with water. Mix water around. Container should stay flat on the ground.                                       |
