For self-serve operations, the Hatco Glo-Ray® Heated Glass Merchandising Warmers increase holding capacities and impulse sales. Featuring Hatco's patented heated glass shelves, product is placed at customers' fingertips, while allowing them to view all their choices at once. Designed specifically to hold hot wrapped or boxed product at proper serving temperatures, the addition of a top shelf used to display short term held food for which serving temperature is not critical, provides extra capacity while using the same amount of counterspace.

The transparent shelf utilizes a patented heated glass, which radiates heat down while conducting heat up, allowing you to hold foods longer and safer at optimum serving temperatures.

### FLEXIBILITY

Available with slant or horizontal shelves, the Glo-Ray Heated Glass Merchandisers are offered in three widths of 27.25", 33.25", and 39.25" (692, 845, and 997 mm), with single or dual shelves.

The patented heated glass shelf provides an even heat source for top and bottom heat to safely hold product, along with superior visibility to promote and display product.

Options and accessories include stainless steel or *Designer* color units, *Designer* color posts, *Designer* color base panels, sign holder for top and middle shelves, flip up doors, and 4" (102 mm) legs.

### QUALITY

The following features assure the finest performance for years to come.
