

DIGI-Q™

DIGI-Q™

Wireless Queuing System

The DIGI-Q™ wireless queuing system is the immediate solution to any environment that requires a number notification system. There is no more messing with wires, just mount the unit to any desired location, connect the included power adapter, and the system is ready to go! As an added bonus, the DIGI-Q™ system includes a manual number dispenser. There is nothing more to buy!

Wireless Transmitter Features: Single push button activation, up to **256** wireless transmitters allowed per single system.
