

# Details For Model: PDSC-350-62

## Aluminum Powered Stair Climber 22 In. x 21 In. x 61 In. 350 Lb. Capacity Blue

When objects are required to be moved up or down flights of stairs, the powered stair climber is the perfect asset. With the large ergonomic handle and tall upright aluminum alloy structure, a single user can transport goods with ease. A wide platform base gives the user the opportunity to transfer a variety of items whether they are heavy, light, large or small. When transferring goods down a set of stairs, the brake is automatically applied to ensure safety and consistent speed of movement. The powered design increases user safety and minimizes the labor associated with moving awkward items. This powered stair climber has two raise/lowering speeds. When not in use, the cart folds into a very compact design that is perfect for transporting in vehicles or storing away in closets. Large polyurethane wheels make traversing over a variety of surfaces as simple as can be.

- Battery will last 2 hours with continuous use
- Battery will last 8-12 hours with intermittent use
- High rate climbing ability
- Built in battery charge indicator
