

Spring Loaded Steel Bollards

Designed to serve as a visual and audible warning to personnel. Unique 30 degree spring-loaded design will bend and not break like rigid bollards. Prevents damage to bollard and equipment. Promotes long life. Order bollard with or without light/siren option. Light/siren option includes sensitive switches that will activate a strobe light and warning siren when contacted. Operates with two 9V batteries (not included). Simply slides into open top of bollard. Each bollard is manufactured from steel and includes a baked-in powder-coated finish for toughness. Bollards measure 42" high (45-1/4" model SPBOL-42-BL) with a 2-1/8" O.D.

- Spring-loaded design will bend and not break like rigid bollards
- Bollard design protects machinery and other equipment
- Steel construction promotes long life
- Powder coat safety yellow finish provides maximum durability
