

Details:

The Bruer Precision Basket range was developed to assist Baristas in consistently extracting quality Espresso.

Every basket is precisely stamped and polished, this process leaves a shiny, smooth, ultra-clean surface finish and is free of rough anomalies that can inhibit even extraction.

Each perforation is tested through a light transmittance test procedure to meet the specifications as part of the quality assurance process. The result provides a competition-level basket that delivers consistency and reliability.

Features:

Precision-stamped extraction perforations.

Each aperture is quality-tested through light transmission.

Competition level consistency and reliability

Specifications:

Size: 22 grams

Suits: 58mm & 58.4mm

Hole diameter: 0.3mm

Hole Quantity: 648

Material: Stainless steel

UPC: '794712364474'
