

8" sensor mirror

Our sensor mirror lights up automatically as your face approaches. Its tru-lux light system simulates natural sunlight, allowing you to see full color variation, so you'll know when your makeup is color-correct and flawless. And unlike traditional makeup vanity mirrors' bulb lighting, our long-lasting LEDs won't burn out or diminish even after many years. Sensor mirror with touch-control brightness is rechargeable; sensor mirror SE plugs into the wall for continuous power.
