Solid Door Refrigerator

Reach-In Bottom Mounts
 New Maximum Series

FEATURES / BENEFITS

Model : MSR-23NM

DIGITAL TEMPERATURE CONTROL SYSTEM

Provides precise and constant temperature. This level of precision allows food products to remain fresh over an extended period of time.

HIGH-TECH MONITOR

The unit will beep if the door has been opened for more than 30 seconds. The monitor digitally displays the present temperature and current status of the refrigerator. You can easily change the temperature by adjusting the thermostat.

STAINLESS STEEL CABINET CONSTRUCTION

The Turbo Air New Maximum model boasts a stainless steel interior and stainless steel exterior with clear coat AL side panels (galvanized steel top, bottom and back). It guarantees the utmost in cleanliness and long product life. Unlike other companies' products, the sharp corners and edges have been rounded to reduce the risk of injury. The New Maximum can add a touch of style to the most refined setting.

EFFICIENT REFRIGERATION SYSTEM

Turbo Air's solid door refrigerators are designed with oversized and balanced (CFC Free R-134A) refrigeration systems. These include efficient evaporators and condensers for faster cooling and greater efficiency.

AUTOMATIC EVAPORATOR FAN MOTOR DELAYS

Through stopping the evaporator fan when the refrigerator door opens, the circulation of hot, moist air into the refrigerator is prevented. This increases energy efficiency and lengthens the life of the compressor.

ADJUSTABLE, HEAVY DUTY, PE(POLYETHYLENE) COATED WIRE SHELVES

HIGH-DENSITY POLYURETHANE INSULATION

The entire cabinet structure and solid doors are foamed-in-place using high density, CFC free polyurethane insulation.

ERGONOMICALLY DESIGNED DOORS

Customers' fatigue fades away with easy grip handles and doors that open effortlessly. Self-closing and stay open door features make this the ultimate choice in customer convenience.

MAGNETIC DOOR GASKETS

Magnetic door gaskets are of one piece construction, removable without tools for ease of cleaning and replacement.

BOTTOM MOUNT COMPRESSOR UNITS

Turbo Air's bottom mount compressor allows easier access for service and extra storage space above. In addition, the lower area provides a cooler and less greasy operating environment which results in reduced compressor running time.
