

F-556

Wells F-556 Built-in Fryer is one of the most durable and versatile fryers in the industry. A swing-up element allows the fry pot to be easily removed for cleaning. The low watt density provides for extended oil life. Fry two separate loads at the same time using individual half-size fry baskets.

Features

- Swing-up element, located below the baskets, allows easy removal of the fry pot for cleaning. Element is heavy-duty stainless steel with low watt density for longer oil life.
 - Element control housing has a spring-loaded support rod to secure element when in a raised position.
 - A positive-off thermostat controls the element allowing for adjustable and more consistent temperatures. A signal light indicates when the heating element is energized.
 - Deep-drawn, removable fry pot is made of nickel-plated steel and is designed to hold fifteen pounds of oil.
 - A manual reset safety thermostat will shut off the heating element power and illuminate the signal light if an over-temperature condition is reached.
 - A terminal block is provided for connection to the main power supply.
 - Two half-size, rear-hanging, interchangeable fry baskets are provided and allow for product versatility.
 - Wellslok allows for quick and easy installation in stainless steel countertops.
- The F-556 Fryer is Underwriters Laboratories, Inc. recognized and meets NSF International standards.
 - A one-year warranty against defects covers parts and labor.
