## FIGHT OFF NASTY MICROBES

**Invading microbes are a fact of life in any commercial kitchen environment.**

It's not hard to imagine how many of these nasty microbes can get transferred to serving utensils. And because dirty utensils and food do not get along, you need the power of Vollrath's exclusive Agion® Silver Ion Antimicrobial Technology. With it, microbes that collect and breed on server handles are attacked and repelled by the handles themselves!

### What does antimicrobial mean?

It means the ability to destroy bacteria, mildew and molds — dangerous enemies to the kitchen. Vollrath, a leader and innovator in professional equipment and smallwares for commercial kitchens, believes in creating products that help keep kitchen environments cleaner and safer through a wide offering of NSF and HACCP products. Our latest innovation, Vollrath® smallwares with Agion, gives you the added advantage of effectively fighting and protecting against dangerous microbial invasions — for the life of the product.

# LADLES

## ONE-PIECE HEAVY-DUTY

WITH KOOL-TOUCH® HANDLES

- > One-piece construction for easy cleaning
- > Accurate bowl dimensions insure consistent capacities
- > Plastic-coated handles are heat resistant to 180°F (82°C)
- > Hooked handle to prevent sliding and for easy storage
- > Grooved handle for added strength
- > Capacities clearly stamped on product for easy identification
- > Heavy-gauge stainless steel shafts and bowls for longer life
- > Mirror-finished bowls, satin-finished handles

## SHORT-HANDLE LADLES

ONE-PIECE HEAVY-DUTY

- > Short 6" (15.2 cm) handles with black Kool-Touch® coating

## TWO-PIECE HEAVY-DUTY

WITH KOOL-TOUCH® HANDLES

- > Black plastisol grip for comfort and safety
- > Cool grip for comfort and safety
- > Capacities are permanently stamped on the handle
- > Kool-Touch® handles are heat resistant to 180°F (82°C)
- > Grooved handle for added strength

## ERGOGRIP™ LADLES

WITH KOOL-TOUCH® HANDLE

- > One-piece construction
- > Stainless steel
- > Offset handle for more comfortable use
- > Shorter overall length permits easy serving under low-profile breath guards
- > Handle stopper keeps the ladle from sliding into serving container

## OVAL LADLES

WITH KOOL-TOUCH® HANDLE

- > Stainless steel
- > Unique shape provides directional pour when serving chili or soup
- > 8-ounce portion-sized

# NSF CERTIFIED DISHERS

## ONE-PIECE COLOR-CODED HANDLES

- > Extended grooved handle provides a sure grip for comfortable use
- > Blade extends beyond bowl to prevent sticking
- > Stainless steel bowl and components to prevent corrosion and insure longer life
- > Color-coded handle for no-guess size selection
- > Molded one-piece handle improves durability, makes cleaning easy and prevents handle from coming apart

Accurate Portions  
and Dishwasher Safe

# TONGS

## ONE-PIECE

### KOOL-TOUCH® TONGS

- > 20-gauge stainless steel
- > Unique springless design eliminates bacteria-prone food traps
- > Kool-Touch® color-coded handles provide easy identification and reduce risk of food-borne illness resulting from cross-contamination
- > Ideal for maximizing your HACCP program
- > Available in three sizes
- > Two grip designs: Utility (scalloped) or VersaGrip®
- > Handles are heat resistant to 180°F (82°C)

No-Pinch Design for Safer Use

**VERSAGRIP®**  
Features flattened ends and gripper teeth. Perfect for grills and broilers.

#### SCALLOPED GRIP

Features concave ends and gently scalloped teeth. Ideal for almost any area of the kitchen.

### HIGH-TEMPERATURE NYLON END ONE-PIECE TONGS

- > High-temperature nylon is heat resistant up to 450°F (232°C)
- > Nylon end will not scratch or mar non-stick surfaces
- > Ergonomic design is comfortable to use and reduces hand fatigue
- > One-piece body construction with over-molded end is sanitary and will not come apart
- > Black plastisol-coated handle provides cool, comfortable grip and is heat resistant up to 180°F (82°C)
- > Concave scalloped utility end gently grips food product
- > Heavy-gauge stainless steel body is resistant to corrosion and rusting
- > No-spring design is safe and sanitary

### POM TONGS

#### KOOL-TOUCH® HEAVY-DUTY TONGS

- > Heavy 20-gauge stainless steel
- > Cool, comfortable grip
- > Insulated coating permanently bonded to tong; it will not slip or peel off
- > Handles are heat resistant to 180°F (82°C)

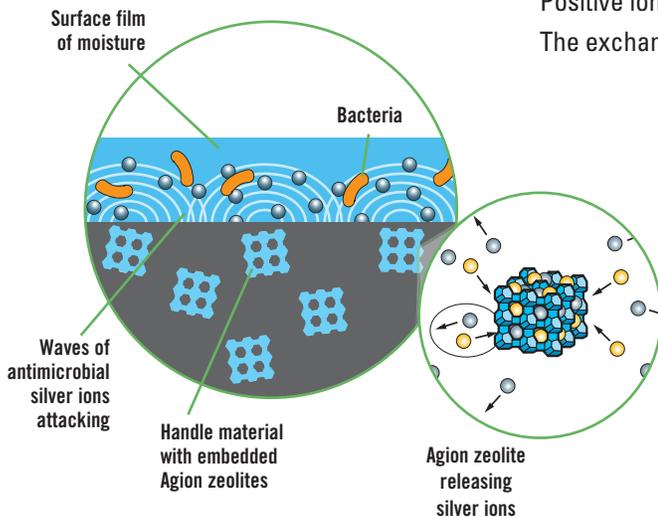

## Silver, nature's antimicrobial.

Silver is natural, environmentally friendly and proven completely safe for food contact. It has no toxic effects on people, but it is very effective in combating a broad spectrum of bacteria. Built right into the handles, Vollrath uses Agion's patented technology to help create a clean, antimicrobial environment. Silver ions naturally and continuously fight the growth of microbes every time a Vollrath utensil handle is touched or comes in contact with moisture. Each time it happens, the silver ions become active and go to work destroying microbes — preventing them from growing into a dangerous population.

## agion® HOW IT WORKS

Positive ions present in moisture exchange with silver ions on the zeolite. The exchanged silver ions are now available to control microbial growth.

### Fighting on all fronts at once.

Unlike chemical or man-made antimicrobials which generally interact with only one specific site on a microbe, the silver-based antimicrobial compound attacks multiple targets on the microbe:

- > Prevents cell reproduction
- > Obstructs cell respiration
- > Starves the bacteria

### Committed to being natural.

The Agion compound used in select Vollrath utensils is less toxic than table salt and one of the few technologies cleared by the FDA for food and water contact.

### Look for this seal.

It is on all Vollrath products that contain Agion antimicrobial protection.

## How Agion compares to other antimicrobials:

Antimicrobial Type	Composition	Regulatory	Longevity	Efficacy	Consumer Perception
<b>Agion</b> Natural Antimicrobial	Natural silver	Full regulatory approval in US, EU and Asia Approvals: EPA, FDA, BPD, EFSA, and NSF	Life of product Non-volatile	Consistent, continuous, predictable Effective in water touch applications	Positive: naturally occurring product
<b>Triclosan</b> Synthetic Antimicrobial	Synthetic chemical	Regulatory approvals in select countries No clear FDA approval	Volatile product which has a short life May stop working	Good in early life of product Difficult to predict over time due to migratory nature of product Not effective in water touch applications	Questionable: unnatural chemical additive

*Always clean product after each use as it does not eliminate food-borne bacteria.*
