

Horizontal Contact Toaster | HCT

HCT-2000

The Horizontal Contact Toaster is the most recent development from Antunes, the recognized leader in bun toasting within the foodservice industry. This new toaster, designed specifically for Arby's restaurants, features a space-saving horizontal design with two lanes for toasting heels and crowns.

With a front load and front return, the Horizontal Contact Toaster can be easily integrated into any prep line. The included bun chute delivers toasted product to a heated base, which keeps product hot and fresh until needed for sandwich assembly.

The Horizontal Contact Toaster also allows operators to make quick adjustments to toast quality with just the press of a button, making it easy to toast a variety of different bread products.

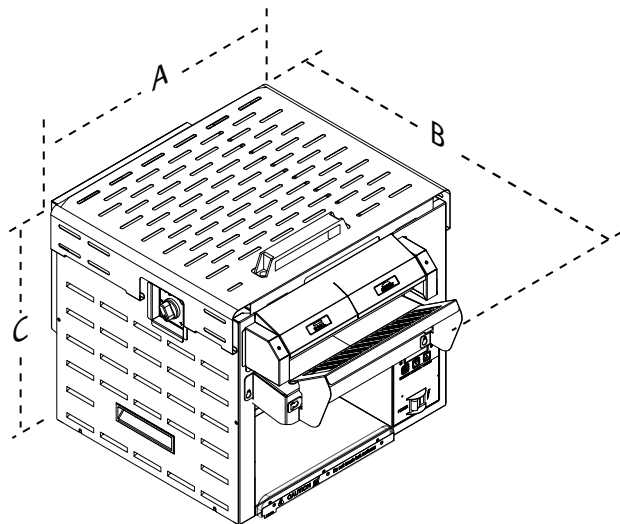

FEATURES

- Space-saving horizontal design with front load and front return.
- Includes an integrated bun feeder for easily loading product into the toaster.
- Easy-to-operate control panel for quick adjustments to toast quality.
- Heated base keeps toasted product hot and fresh until needed for sandwich assembly.
- Programmable controls allow operators to adjust the Platen Heater Temperature, Auxiliary Heater Temperature, and Motor Speed.
