3 steps to a Fresher Cooler

1 Place box in all coolers and freezers*

2 Open side flaps for ventilation

3 Replace box after 2 months for maximum freshness

Bonus
After 2 months, pour down drains and grease traps with warm running water to deodorize

Nothing is more important to your business than food. And nothing helps keep it fresh like Arm & Hammer® Fridge-N-Freezer® Baking Soda. It's an **easy, effective, and economical** way to control odor and stop cross-contamination of food scents. Ideal for everything from reach-in and walk-in refrigeration and freezing units to sandwich and pie cases – wherever food is stored. Fridge-N-Freezer® uses the unique power of Arm & Hammer® Baking Soda to **lock in odors and keep your foods tasting fresh and wholesome.** Every Fridge-N-Freezer® pack has a unique cloth filter to keep baking soda from spilling. After 2 months of deodorizing your cooler or freezer, it's still useful. Just open the container and pour down drains, grease traps and garbage disposals with warm running water to freshen them. With Arm & Hammer® Fridge-N-Freezer® packs, you can help your foods stay fresh and tasting their best.

Application	For Regular Odors		For Strong Odors
