Style	Freestanding
Type	Spindle Mixers

Notes & Details

Whip up a milkshake or frozen beverage with the AvaMix ADM3 freestanding triple spindle drink mixer / milkshake machine. This powerful unit features three spindles that operate with or without malt cups attached. When a cup rests in one of the two cup holders on a spindle, it engages the power button and mixes for hands-free operation. The speed of the spindle is controlled with a two-speed rocker switch, and the cup holder used determines the height of the cup during mixing. To operate the machine while holding the cup in hand, simply attach a small rubber cap (included) to the power switch to keep it engaged, manually move the cup around the spindle, and toggle the speed switch as needed. This unit can create your most popular milkshake, but it also has the ability to whip up eggs, pancake batter, waffle batter, and other dishes! For milkshakes using hard ice cream or mix-ins, simply add milk to your ice cream of choice and blend until smooth.

Three 32 oz. malt cups made of stainless steel are included. Not only are they durable and easy to clean, they keep beverages cold as they're prepared. Each cup also boasts a one-piece design, meaning that it won't leak at the base like other malt cups. Plus, markings on the cup show the minimum and maximum fill lines for easy use.

This machine features a robust 1200W motor head, delivering exceptionally high quality results in very little time. It also operates quietly, perfect for behind the counter, the bar, or in another front-of-house area. A sturdy, round base stabilizes the spindle and motor and includes rubber feet to prevent slippage. Built for regular use in high-volume establishments, the machine ships with a replacement agitator set so that your business can enjoy consistent operation with minimal down-time. A 120V electrical connection is required for operation.
