Usage	Bar Blending Food and Drink Blending

Notes & Details

The AvaMix BL2E 64 oz. commercial blender with digital touchpad controls delivers the power and versatility needed in a blender that will reliably churn out smoothies and frozen cocktails at busy bars or restaurants. The compact base packs a powerful punch thanks to a 2 hp motor that boasts an impressive 1500W, combining with heavy-duty stainless steel blades to effectively crush ice, mix drinks, or even blend together house-made spreads and salsa!

Intuitive touchpad controls make operation simple and easy to learn. The touchpad features 3 speed settings for optimum control, and the timer can be set in increments of 30 seconds up to 60 minutes. For added convenience, you can blend using either a time and speed setting, or blend by sight simply by choosing a speed and letting your blender work until the desired consistency has been reached. When you need a quick burst of power to finish off a recipe or clear the blade area, it also has a convenient pulse button to throttle the unit on "High" speed.

The 64 oz. BPA-free Eastman Tritan™ jar design provides maximum durability while allowing this model to handle large volume blending. A 2-piece lid lets you add ingredients to the blender at any stage in the mixing process - simply remove the clear center lid and use the included tamper to push the add-ins down into the jar. A sleek and sturdy ABS plastic base looks great on any bar counter while also making it easy to clean. For added convenience the jar pad is dishwasher safe, but the jar should be washed by hand for maximum product life. This blender requires a 120V electrical connection.
